Pitch Presentation

Our Collaborative Portfolio Website

Team Members

Effah Aboagye (Full-Stack/Project Manager)

Description of the Project

- We're creating a collaborative developer portfolio to showcase our skills in frontend development.

- The site will feature a dynamic project gallery and a contact form integrated with Formspree.
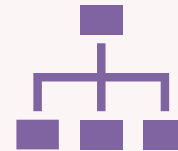

Learning Objectives

- I will sharpen my React and UI/UX skills.

- I will improve my API integration and backend development knowledge.

- I will focus on project management, design, and form handling.

Technologies Used

- React, Node.js, Express, GitHub Pages, Formspree

Challenges Already Identified

TIME MANAGEMENT IS A POTENTIAL CHALLENGE.

COORDINATING THE DYNAMIC GITHUB API INTEGRATION NEEDS CAREFUL PLANNING.

Work Schedule

- I am using Trello to manage our tasks. Each sprint will last 3-4 days, and we'll check in daily to monitor progress.

Mock-ups

I have wireframes for the landing page, the project gallery, and the contact form.

Video Recording

- We will record a video of presenting the design, explaining the API work, and going over the overall project management.
